

Incomaster

Incontinence Waste Disposal

*Fast, efficient and safe disposal of incontinence waste and sanitary pads – **Incomaster** is trusted by thousands of care facilities around the world to reduce the risks, issues and costs associated with bags of waste.*

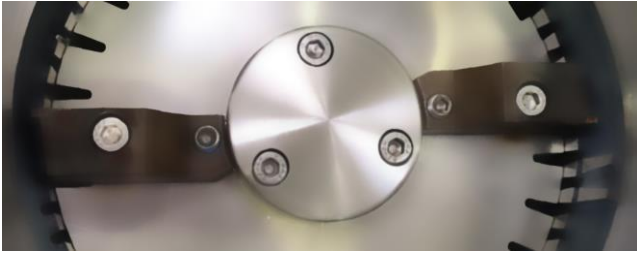

HYGIENIC – SIMPLE – ECONOMICAL

Hygienic

Getting rid of resident incontinence waste as soon as possible rather than bagging and carrying around

- ✓ Reduces unpleasant odours on site
- ✓ Reduces infection risk to staff and residents
- ✓ Helps keep rooms clean and tidy

The Incomaster also incorporates a sanitisation cycle to assist with your cleaning standard operational procedures.

Haigh's unique cutting system ensures that large particles do not enter your drainage system

Convenient

Incomaster is designed for ease of use:

- ✓ Minimal user training required
- ✓ Touch free opening
- ✓ Automatic Start
- ✓ Easy-wipe surfaces with embedded antimicrobial silver ions

The **Incomaster** builds on Haigh's decades of experience designing and building the best macerators based on the metrics that matter the most to our customers

- ✓ Fastest
- ✓ Quietest
- ✓ Smallest
- ✓ Most economical
- ✓ Most reliable

Economical

Incontinence waste from patients typically costs in the region of **£912.00** per resident per year* using yellow bag systems.

Typical water and energy costs for **Incomaster** on a like for like basis are approximately **£15.00** per annum.

A range of maintenance and leasing agreements are available to ensure your overall costs are compelling, with clients reporting overall savings of **up to 65%**.

“WE DON'T KNOW WHAT WE WOULD DO WITHOUT OUR INCOMASTER”

SENIOR STAFF NURSE, WESSEX CARE

“THE SMELLS FROM BAGS WERE GONE FROM THE DAY WE INSTALLED IT”

GENERAL MANAGER, ORDERS OF ST JOHN CARE TRUST

Smart Systems

Internet enabled** to give you:

- ✓ Daily Usage report
- ✓ Energy and Water usage
- ✓ Smart Maintenance capabilities

Base your maintenance on actual usage rather than rely on traditional fixed schedules.

- ✓ Increases up-time
- ✓ Decreases running costs
- ✓ No complicated set-up

* £1.10 per kg x 2.4 kg per patient per day x 365 days as measured over 30 day trial at Hampshire county council, 2015

** remote monitoring option, subject to terms and conditions
